

# Are You Sharp Enough?

## Courses to Keep You Sharper than the Rest

Our Learning & Development (L&D) experts partner with you to develop learning solutions that include industry best practices and relevant, hands-on experience. Our programs help individuals meet professional development goals and assist organizations in meeting business needs.

## What We Offer

We deliver an interactive and engaging experience to enable better retention of critical concepts. We provide commercial-off-the-shelf (COTS), tailored, and customized courses in Project Management, Systems Engineering, Leadership, and Cybersecurity, facilitated by experts with real experience.

Our L&D programs offer training via multiple platforms including classroom, video teleconference (VTC), and web-based. We create accredited courses using a traditional instructional systems design (ISD) model and manage all aspects of implementation – evaluating training program success using industry standard methodologies.

---
